

FAIR SHARE Monitor 2023

About the FAIR SHARE Monitor

The FAIR SHARE Monitor is a data-based tool that measures and tracks gender equity in the international social impact sector.

Based on data we either receive from organisations or research for them, we create a ranking of organisations based on the proportion of women in their leadership.

The progress, stagnation or regress of each organisation is measured and made transparent from year to year – making the FAIR SHARE Monitor a tool with which both individual organisations and the sector can hold themselves accountable to gender equity.

Which data did we collect in the FAIR SHARE Monitor 2023?

Gender distribution in:

- Staff
- Senior management teams
- Boards

Number of BIWoC in staff, SMT and Board

Data on non-binary and gender-diverse employees

Gender equity/anti-discrimination policy

82 organisations invited

to take part in the FAIR SHARE Monitor in 2023

Σ = over **275,000** staff

73 participated

-  **60** Previously monitored (82%)
-  **13** New organisations (18%)
-
-  **9** Removed

Highest participation rate in 3 years

Does the social impact sector walk the talk on gender equity?

Women's representation in the social impact sector

Women on staff

Women in leadership

Men's representation in the social impact sector

Men on staff

Men in leadership

Less than half of organisations led by women

Organisations with Women CEOs

Even fewer Boards chaired by women

Boards with Women Chairs

BIWOC under-represented among women leaders

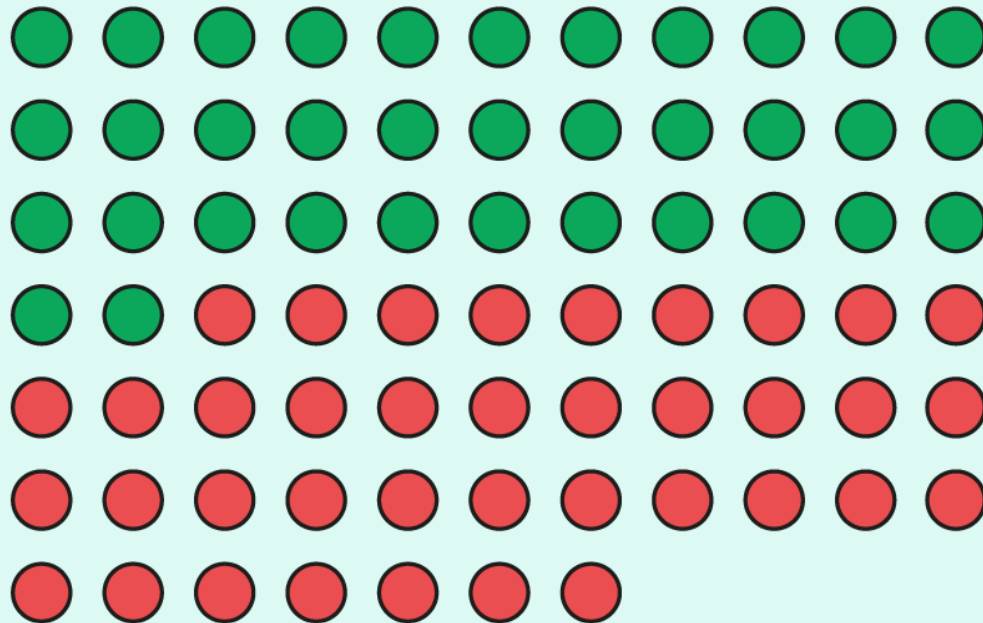

Women in leadership

Proportion of BIWOC among women in leadership

Women under-represented in over half of organisations

35 Organisations

with a FAIR SHARE

38 Organisations

without a FAIR SHARE

Out of 73 participating organisations

The FAIR SHARE Index

The FAIR SHARE Index measures the gap between the proportion of women on staff and the proportion of women in leadership. **The lower the index, the more fairly women are represented in an organisation.**

We define a desirable FAIR SHARE as an index of 15 or lower.

In the Monitor 2023, the **average FAIR SHARE Index is 20.4**, with 52% of organisations having an unequitable representation of women.

Women still unfairly represented in the social impact sector (FAIR SHARE Index)

Comparative advantage

Higher than a woman's to
reach a leadership position

Co-leadership: The less travelled path

Co-leadership in **12 organisations**

8 out of 12 organisations practice co-leadership with at least 50% of women CEO.

Co-leadership may be **promising for gender equity.**

When organisations do choose to distribute the CEO or ED position across more than one person, women have higher chances of being represented, with **men's comparative advantage dropping to 1.5** and an **average FAIR SHARE Index of 13.26.**

31 international organisations have made the commitment to achieve gender equity

Majority of **Committed organisations** have a FAIR SHARE of women leaders

Out of **31** committed organisations

20 Organisations

with a FAIR SHARE

11 Organisations

without a FAIR SHARE
